

Catalyzing and equipping business leaders to start and run local, organic, apprenticeships.

REIMAGINATION

Opportunities exist and the time is right to reimagine new solutions to the conventional high school-to-career path that has left employers weary of ineffective workforce initiatives and younger workers feeling disenfranchised.

APPRENTICESHIPS

One solution - apprenticeships!
The HomeGrown Operating System equips local leaders by expediting the startup process and supporting the execution of local apprenticeship programs.

CATALYSTS

Where to start? Catalysts - those business leaders motivated to start the reimagination process, serve students, affect community vibrancy, improve local economic health, and ensure a well-prepared, local talent pool.

7 WEEKS TO LAUNCH

In seven weeks - from the Readiness Workshop to the first apprenticeship - HomeGrown will equip community leaders to execute and manage locally, organic apprenticeships.

ENGAGE

Gather fellow community leaders and engage HomeGrown in a vision-casting conversation to start the reimagination process and transform your community. Inquire about our Spark Talk to ignite interest.
